

Printing Mesh

Polyester Printing Screen Mesh Fabric is one of the most highly developed high-tech mesh fabric products since 1990's for screen printing. With imported high class material, Amrit Filtration equipments produces better-quality quality polyester and polyamide bolting cloth meant for screen printing. We also have the most sophisticated testing instruments and technicians well qualified to guarantee a trustworthy quality.

Features

Monofilament Polyester Screen Printing Mesh(Low-elongation) Features:

Low-Elongation Mono filament Polyester Screen printing mesh is what we are producing now in a wide range of mesh counts, and our products offer significant advantages over the traditional mono filament polyester:

1. More rapidly tensioning without harm to the threads
2. Enhanced fabric strength
3. Quicker tension stabilization
4. Superior tension threshold and breaking point
5. A lesser amount of tension loss during the stretching process
6. Faster turnaround time from the screen room to the pressroom
7. Enhanced registration due to constant tension
8. Faster Print speeds
